

## Overflow Crowd Hears Premier

Central Alberta Pavilion Filled to Capacity, With Many Outside Hearing Speech Through Loudspeakers; Financial Interests Rapped

"We have only our credit left, and I won't give it up," declared Premier William Abernethy amid great applause and cheers at the Central Alberta Pavilion, Lacombe, on Wednesday night.

Speaking to a crowd of about 1,500 inside the pavilion itself, with a listening room impossible to obtain and standing room at a premium, Premier Abernethy and other Social Credit speakers recounted what steps had been taken in their first eleven months in office at Edmonton to re-formulate the principles of Social Credit. Long speeches carried the voice of the people's representatives to the overflow outside the pavilion.

**Tells of Huge Debt**

Speaking to the throngs which crowded the newly formed party at the time when they first took office, on September 2nd, 1935, the Premier first touched on the bonded indebtedness of the province, which totaled \$71 millions, including provincial, municipal and private mortgage indebtedness.

He told the audience of the steps taken to pay off provincial bonds maturing since he took office; of the realization that 74 millions in interest was being paid by the province each year, when the revenue for the same period was only 13 millions; of the only sensible method of paying off these bonds at a lower interest rate.

**Refers to Negotiations**

The Premier told of the negotiations made to mature these bonds with the federal government, to obtain the lowest possible interest rate, and subsequent action.

"It is better to default, or go on and on, and fill the time with a constant, never-ending, and ever-increasing interest," he said.

He claimed that bondholders' representatives told him that the interest on bonds was excessive, but he couldn't touch it, but "if interest on bonds the only sacred thing we have in this country, is the hope or faith in our future," he asked, could we not touch it?

**To Use Province's Own Credit**

Speaking of prosperity certificates, Premier Abernethy announced that \$500 in certificates was to be given to every constituency in Alberta. "If money, bonds, money," he said, "is the only sacred thing we have in this country, is the hope or faith in our future," he asked, could we not touch it?

**C. M. Laverly Is Appointed Inspector of Schools at Oyen**

It will be of interest to learn that C. M. Laverly, principal of the Lacombe High School, has been appointed inspector of schools for the Oyen district. Announcement of this appointment was made by Premier Abernethy, Minister of Education, last Tuesday.

**Accident Occurs On Gull Lake Road**

An accident, just past Henderson's corner on the Gull Lake road, on Monday night at 10 o'clock damaged two cars to the total extent of \$300.

One car, driven by A. E. Linkow of Lacombe, crashed into a 1934 Ford driven by William Jackson of Innisfail.

The 1927 Chevrolet, driven by Mr. Linkow, crashed head on into the Ford. Mr. Jackson was pulling over to the right side of the road. Mr. Jackson's car was damaged to the extent of \$225, while the Chevrolet received damage to the amount of \$75.

Driving with Art Linkow were Dick Wilton, Jim Shaw, Pat Hay, Gladys Blund and Mary McLeod. Outside of a few bruises, nobody was hurt.

**To Hold Field Day For Soldier Settlers**

The Experimental Station, Lacombe, will be a rendezvous for some hundreds of soldier settlers when the Annual Field Day for soldier settlers is held Friday, August 5.

Representation is expected from all settlements between Edmonton and Calgary. A special feature of the day will be an examination of over one thousand plots grown from seed as used by farmers. All the branches of the station will be inspected and discussed.

## CANYON

CANYON.—A dance held recently at the Canyon School was attended by a jolly if somewhat small crowd. Those attending had such a good time that it was decided to hold another dance, which will be held on August 14th. Make a note of it and come to share in its enjoyment. The pleasant and shady spots around "Canyon River" are attracting a large number of week-end visitors.

A sign of prosperity in the district is noted by the erection of a fine new barn on the farm at Alton Park.

## This Week's Thought

Imperfect knowledge is the parent of doubt, though and honest research dispel it.

## DAMAGE TO CROPS CAUSED BY STORM

Some Districts Badly Hit; Others Escape, and Rain Beneficial

A thunderous hail storm of particular violence struck Lacombe and its immediate vicinity last Friday night, leaving in its wake some badly damaged crops. North and west of Lacombe in particular, the damage seems to have been quite heavy. In spots, well to the north and east comparatively little damage was caused by the mid-summer curse of farmers.

In a check-up made by the Western Globe from farmers living in several directions from Lacombe, the following information was secured: George Hand, 7 miles east: The hail lasted just long enough to do considerable damage. About 50 per cent loss to his crop. The two quarter sections north of this farm show losses close to 100 per cent.

Roy Flegel, 8 miles north: Approximately 20 to 25 per cent loss by hail. Hailstone 1/2 to 3/4 inch, heavy, while a foot of the moisture received did almost as much good as the hail did harm.

Roy Whitecotton, 10 miles north-west: Hail was very heavy. It did not do much damage to the crops, but it did break up the soil to a depth of one inch the morning after the storm. Close to 75 per cent loss in crop. While the wheat was not beaten to the ground, the heads were cut off in parts of the field.

George Brown, 6 miles north-west: Almost no loss at all. Moisture very beneficial. Hail was reported to have been exceedingly bad about 10 miles north of this point.

Elwell Blackfalds: No hail at all. Little rain but a terrific wind. Rain penetrated into the ground not more than one inch.

Bob Lindsay, near Toffrey: Bad winds and some rain. Only a few scattered stones of hail. Rain lasted not more than 10 minutes.

Jim Miller, 4 miles west: No hail to any marked extent. Wind bad and very little rain.

Bob Lawrence, 12 miles north-west: Got beneficial rain in sufficient quantity to break up the soil. Hail very slight, causing no material damage to crops.

## Blackfalds

BLACKFALDS.—Public School results for Grades 7 and 8, recently released, are as follows:

Pupils in Grade 7: 1935-36: William Flegel, Marjorie Apps, Lawrence Landry, Homer Martin, Lucella Royce, Helen Stevenson, Bert Warren, Frank Woss. Pupils promoted from Grade 8 to 9: Lavinia Gaskell, Margaret Long, Mary McAllister, Ella Miller, Cherry Martin, Gladys Peterson.

Oliver Blue, who was agent for the Seale Grain Company here some years ago, is again returning to take over the post here. George Ross is taking over the elevator that Mr. Blue is leaving.

**Home for Week-End**

E. G. Hale and Stanley Farewell, who are attending Summer School in Edmonton, spent the week-end at their respective homes in Blackfalds.

Mrs. Crocker and her two younger children were visitors in Spruceville for a couple of days last week.

Mr. and Mrs. Barron left on Monday for a few days' trip to Lake Louise.

Mr. and Mrs. Warren and family are holidaying at Gull Lake for a couple of weeks.

Mr. and Mrs. Gwyn and her two children are visiting the former's mother, Mrs. Fred Bliss.

**Visitors From Nevada**

Mr. and Mrs. Hamilton and family are attending to the recent visit to Mrs. Hamilton's parents, Mr. and Mrs. Gibbons.

Laurence Martin and Ernie Oliver, who are attending to the recent visit to Mrs. Oliver's parents, Mr. and Mrs. Gibbons.

The Crusaders, who include Mary McAllister, Audrey Crocker, Joan Canrose, Marjorie Apps, have just returned from camp at Gull Lake. All report having a very good time. Agnes Farewell also accompanied them.

Mr. and Mrs. Moir, Mary and Joyce were visitors in Edmonton during Exhibition week.

**Go to Athabasca**

Mrs. Egerton is away on a few weeks' holiday at Athabasca.

Of interest to those around Blackfalds is the marriage of Virgil Blackmore and Nancy Johnson of Bentley. The happy event took place at Bentley on Tuesday night and was followed by a wedding dance at Spruceville Hall the same night. All extended the young couple many good wishes for their future happiness.

Miss Dorothy Brakine of Durham district is home again with her parents for a brief stay after living in California for a number of years on missionary work.

**Man Breaks Leg When Team Bolts**

RIMBEY.—Thrown from a wagon when his team bolted, Leonard Lockren, Pendery homesteader, lay helpless all night on a lonely road with a broken leg until a search party found him.

With the bone shattered, Lockren was unable to move owing to the pain. A search party was sent out when the team returned to the barn.

## "CANADA" KEEPS WATCH AT VIMY

Large Canadian Contingent On Hand to Do Honor to Canada's War Dead; Dignitaries of Three Countries Are Present

VIMY RIDGE.—Enfolded flags released at the touch of a King's hand disclosed to the world on Sunday the white stone symbol of Canada's sorrow and her honor and remembrance. On this battle-pocked ridge of Vimy—its scars healed now by the immortality of grass—King Edward VIII, stood in the presence of 400 Canadian veterans, of grey war mothers, to dedicate the stately monument to those other thousands

who sleep in the encircling plains. Representatives of the British and Canadian governments, the president and ministers of France, joining in a rejuvenation of the comrade-spirit that led the allied armies through four years of war.

**Expect Liquor Store To Open Sept. 1st**

Alterations are now under way in the building formerly occupied by Gilks and Hughes, Barnett avenue, which has been selected as the location for the Alberta Liquor Store in Lacombe and will necessitate the moving of Betty's Style Shop to the building formerly occupied by Lacombe Electric.

The counters, shelves and refrigeration is to be installed under the direct supervision of the department of Public Works through their representative, Olive Umbach. All local labor is being employed.

It is expected the store will be open for business by September 1st.

**BERT PILLSBURY PASSES SUDDENLY**

A well-known resident around this town, Bert Pillsbury passed away quietly at his home early Monday morning.

Conveying from a ten-day siege of pneumonia, a heart attack proved fatal to the deaf mute.

Mr. Pillsbury had been a resident of Lacombe for close to 17 years and previous to that had spent 10 years in the United States and educated at Nebraska School.

In his school days, Mr. Pillsbury was selected along with four other deaf mutes to attend the art school at the first Chicago Fair.

Painter and decorator by trade, Mr. Pillsbury was a well-known figure around town and will be missed to no uncertain degree. He is survived by a sister in Montana.

**NEW PRINCIPAL OF LACOMBE SCHOOL WEDDED**

INNISFAIR, July 27.—St. Andrew's Presbyterian Church, Innisfail, was the setting for a very pretty wedding on Saturday, July 25, at five o'clock, when Janet Webster Watt, elder daughter of Mr. and Mrs. W. C. A. Watt, was united in marriage to Mr. Belsley.

Mr. D. K. Anderson, M.A., performed the ceremony in the presence of a large number of invited guests and friends.

Immediately after supper, Mr. and Mrs. Warren left by car for Vancouver, where the honeymoon will be spent.

Mr. and Mrs. Warren are two of Innisfail's very popular young people, the groom having been vice-principal of the Lacombe High School for a number of years, but recently appointed principal of the Lacombe High School.

Mrs. Warren is a most accomplished musician, having the degrees of A.T.C.M. and L.R.S.M. in both piano and voice. She has been ever willing to help in any good cause and will be greatly missed.

They will make their home in Lacombe after September 1st.

**College Heights**

KOLLEGE HEIGHTS.—Professor M. H. Philbrick, head of the Ukrainian Department of Canadian Junior College, is spending the summer studying the Ukrainian language in Europe. A recent postcard received from him bearing some such vague address as "Modrany a Praly, 3482, Czechoslovakia, Europe," states that "I am working hard and enjoying my work. I have to eat about six meals a day—pity me! but it's the custom here. Country is beautiful, weather ideal and the people most gracious."

Professor H. K. Martin recently left to attend the Seventh-day Adventist camp meeting in the Peace River district at Roycroft, Alta.

**Former Student Visits**

Professor Aleck, formerly a student of Canadian Junior College and a resident near Lacombe, returned for a visit last week after an absence of 11 years. Mr. Aleck is at present principal of the Battle Creek Academy at Battle Creek, Mich. He is also connected with a church of 200 members of the Seventh-day Adventist denomination at that place.

Elder L. H. Martin, pastor of the T. C. M. Church, Seventh-day Adventist Church and instructor in Theology at Canadian Junior College, is spending the summer pursuing further studies at Pacific Union College, Angwin, Calif.

**Leaves for States**

Mrs. M. H. Philbrick, with her two children, left by train for the States last week to visit her parents. In the Fall she expects to go to New York to meet her husband, Professor Philbrick, when he returns from Europe. They will then return to Canadian Junior College, Lacombe.

Mrs. Philbrick was just as thrilled with the prospects of a train ride as were her children, never having travelled by train since coming from Sweden as a little girl a number of years ago. For the past few years motoring has been their means of transportation.

## Camrose Player Cops First Money In Golf Tournament

R. Capstick of Camrose Defeats H. Johnston of Camrose, 2 up and 1 to Go; Ideal Weather

R. Capstick of Camrose won the Seventh Annual Golf Tournament at the Lacombe Golf and Country Club Thursday last. He defeated Herb Johnston also of Camrose, two and one. The weather for the tournament was ideal and the golf of the highest caliber. Several games went into extra holes before the winner was decided.

The results of the second day of play follow:  
 Championship Flight, Second Round  
 Robertson beat Nash; Capstick beat Willis; Stewart beat Miller; Herb Johnston beat Hubbard.

Championship Semi-Finals  
 Capstick beat Robertson; Herb Johnston beat Stewart.

Championship Final  
 Capstick beat Herb Johnston.

First Flight, Second Round  
 Graburn beat Henderson; Beatty beat Mitchell; Henselwood beat Senby; Johns beat O'Dell.

First Flight, Semi-Finals  
 Beatty beat Graburn; Henselwood beat Johns.

First Flight, Final  
 R. Henselwood, Calgary, beat Morris Beatty, Red Deer.

Championship Consolation, Semi-Finals  
 Mather beat Taylor; E. H. McCaughey beat Jarvis.

Final  
 M. Mather, Castor, beat E. H. McCaughey, Lacombe.

First Flight Consolation, Semi-Finals  
 Wallace beat Bond; Gillespie beat Barker.

Final  
 Hamish Gillespie, Edmonton, beat W. Wallace, Norberg.

Second Flight Consolation, Semi-Finals  
 Moyness beat M. Johnston; Ross beat Kay.

Final  
 P. B. Ross, Edmonton, beat Jack Moyness, Camrose.

Third Flight Consolation, Semi-Finals  
 P. Thorp beat Ross; Winters beat Drake.

Final  
 P. Thorp, Bentley, beat L. H. Winters, Lacombe.

Second Flight, Second Round  
 Taylor beat Orr; Lamourier beat Chisholm; Paulson beat Willis; Morrison beat Duncan.

Semi-Finals  
 Taylor beat Lamourier; Paulson beat Morrison.

Final  
 A. J. Taylor, Wetaskiwin, beat M. Paulson, Camrose.

Third Flight, Second Round  
 Beaton beat F. Thorpe; F. Robinson beat R. G. Johnston; Peters beat Kinnear; Richards beat Winters.

Semi-Finals  
 Beaton beat Robinson; Richards beat Peters.

Finals  
 J. S. Richards, Edmonton, beat W. H. Beaton, Hughenden.

**REAL COMPETITION**

The story goes that two Liverpool butchers were competitors.

"Sausages, one shilling the pound," was the announcement in the window of the first shop.

"Sausages, ten pence the pound," was over the door of the other shop the next day.

"Sausages under one shilling cannot be guaranteed," was the comeback of shop number one.

"We furnish sausages for the King," was the next announcement of shop number two.

Shop number one, not to be outdone by such methods, and to settle the argument, put out the following sign the next morning: "God save the King!"

In the years to come much ingenuity will be needed in the effort to isolate and strengthen the nerve centers of industrial civilization.—R. G. Tugwell.

## Premier Reiterates Promise To Pay Basic Dividends

**Registration for Dividends to Start August 1st; Single Unemployed Jobless Men Turned Away by Government's Representatives**

By T. B. WINDROSS

EDMONTON.—Registration for Social Credit basic dividends will commence on August 1st and approval for this was given by the caucus of Creditor members which met in the capital during Thursday, Friday and Saturday morning.

That is the big news in governmental circles at present.

The Premier's promise to pay basic dividends within 18 months from the time he took office is to be fulfilled, although there is a possibility the dividends will not be as large to begin with as \$25 a month.

Bad crops and drought are a determining factor which will have some bearing on the matter, and are a factor beyond the control of politicians and governments.

Members of the caucus discussed the problems that have arisen through the drought situation in the southern parts of the province and Hon. Mr. Chant, Minister of Agriculture, stated in an interview that the government is preparing a defensible policy to deal with the situation.

Hon. Charles Cockroft, Provincial Treasurer, is now in Ottawa discussing various business matters with the federal authorities and he will also broach the matter of drought relief.

Mr. Chant is prepared to go to Ottawa also to meet federal ministers and lay the needs of Alberta before them.

"The drought situation is a national calamity and beyond the ability of the province to solve," Mr. Chant stated.

"It is therefore necessary for the Dominion to do something to help the province in its serious plight."

The first break in the ranks of the Social Credit party came during the past week and S. A. G. Barnes, Creditor member for Edmonton, was finally read out of the party by the caucus.

The history of the break goes back to the time of the election when Mr. Barnes thought he should have been given a cabinet post, preferably the portfolio of education, but Premier Aberhart, as an experienced teacher, took that office himself and Mr. Barnes was not given cabinet rank.

It is said the ousted Edmonton member was aggrieved over that and has not been a 100 per cent Social Creditor since. He at one time refused to appear before the central executive and explain his activities and during the session last March voted on an important measure with the opposition against the government.

This will not be the first political change Mr. Barnes has made in his career, as at one time he was a supporter of the Labor party. His plans for the future have not been revealed yet. Neither is it decided where he will sit in the House if he continues to be a member.

At present his seat is significantly placed next to the Conservative group at the extreme end of the Social Group in the House.

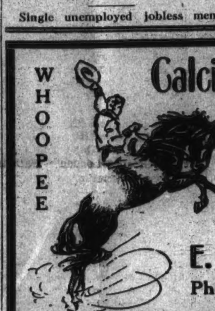

Mr. Barnes is said to be contemplating resigning his seat and running in a by-election to test the stand taken by the government, but informed quarters consider there is no likelihood of him taking such a step.

If the break came when the Edmonton member wrote an open letter, also handed to the press, in which he strongly criticized Premier Aberhart and his methods, stating "they savored of Fascism." Then the Premier stated in public that Mr. Barnes had been suspended by the executive council two months ago.

To this, Mr. Barnes replied by a letter to Hon. Mr. Tanner, Speaker of the Legislature, and chairman of the caucus.

ity of the executive to discipline him. That brought the matter to an issue and the caucus elected Mr. Barnes from the party.

## Pay Tribute To Memory Of Man Who Did Much For Agriculture In Canada

Doubtless there were few persons who foresaw that the birth of a boy in the County of Devon, England, on June 16, 1836, christened William Saunders, was an event that would later prove of the most profound significance to the Dominion of Canada. The fact is that no other man has made a greater contribution to Canadian agriculture than the late Dr. William Saunders. The chain of Dominion Experimental Farms and Stations is a virtually a monument to the work he began 50 years ago, for he was the first director of this system of farms, which are now located in strategic positions across the entire length of the Dominion.

The new administration building at the Central Experimental Farm to be known as the William Saunders Building, and which was opened on June 6, stands upon the site of his former home.

William Saunders came to Canada as a boy of 12 with his parents, who settled at London, Ontario, and there on September 13, 1914, three years after his retirement as director of the Dominion Experimental Farms, his long, useful life closed. His death removed a man whose contribution to the national welfare in its widest aspect, was fully equal to that of any statesman, or great man in any of the other vocations. It was said of Dr. Saunders that "no man did more or will ever have the opportunity which he had and of which he took the fullest advantage to increase the production of land in Canada."

When Hon. John Carter (later Sir John) as Dominion Minister of Agriculture, who represented London, Ontario, in the House of Commons, was authorized in 1885 to proceed with the organization of a system of experimental farms, he selected his fellow citizen, William Saunders, who by that time had established a reputation as a botanist, entomologist, horticulturist and business man, to visit the United States for the purpose of learning how the experimental stations in that country were operated and with what success.

The previous year a Select Committee of the House of Commons was appointed to inquire into the best means of encouraging and developing agriculture in Canada, and the establishment of experimental farms was the committee's recommendation. William Saunders' report, following his visit to the United States, resulted in the passing of an act in 1886 which provided for the establishment of an Experimental Farm for the provinces of Ontario and Quebec jointly, this farm to be known as the Central Farm—together with one for the Maritime provinces in Canada, and one for the Northwest Territories (now the provinces of Saskatchewan and Alberta) and one for British Columbia.

Dr. Saunders' interests, however, included all phases of ornamental horticulture. He was largely responsible for introducing and disseminating in Canada the Caragana or Siberian Pea Tree, which he recognized as having great possibilities for Western Canada on account of its extreme hardiness and rapid growth under semi-arid conditions. His breeding work with roses resulted in the creation of varieties such as the Agnes and Mary Ann, while many new varieties of gladioli and other flowers were the result of his efforts. His knowledge of Canadian trees and shrubs resulted in the Arboretum at the Central Experimental Farm, Ottawa, and excellent plantings on the five earlier experimental farms and on many public institutions throughout Canada.

Dr. Saunders' introduction to Canada of many varieties of forage crops which play a very important part in the present production of such crops is probably not generally recognized. It was he who in 1887 introduced Brome grass from Russia. Earlier work inaugurated by him brought into domestic use on an acreage of Western Rye grass, while his early interest in the introduction and adoption of better varieties of corn, clovers, and the like, resulted in experiments which in turn caused the adoption of crop practices on which the live stock industry of Eastern Canada has been built.

Because of the great needs for newer and better cereals and the lack of such varieties throughout the world, Dr. Saunders displayed a particular interest towards the unexplored field of plant breeding. He realized that a significant contribution was possible in the field of cereal production. The great North West needed earlier maturing and better varieties. Shortly after his appointment as director of Experimental Farms he undertook to apply the same methods of plant breeding to cereals as he had already succeeded in applying to such crops as tree fruits. Importations of varieties of wheat were made from Northern Russia, Northern India, Japan, United States, and elsewhere, but those from the first two mentioned places proved to have the least suitability he so much desired. Unfortunately these varieties were low in yield and of inferior milling quality; hence, in 1888 he began a pro-

gramme of cross-breeding which in five years' time produced over 700 new sorts of wheat, the most of which carried the parent characters of either Red or White Rye varieties which were well known as later maturing, high quality wheats, with also the early maturity characteristics of the imported sorts. Many varieties of cereals which were fixed in type and distributed by him from this earlier work include spring wheat such as Huron, Percy and Preston, Stella barley and Arthur and Mackay field peas. Many exceedingly promising second and third cross wheats still remained to be perfected by rigid selection, such as Markham, the variety from which Marquis was later selected.

By the year 1903 Dr. William Saunders had trained his son, now Sir Charles Saunders, as his successor in cereal breeding work and turned over to him for further perfection some 48 varieties of wheat, 11 varieties of oats, 23 varieties of barley, and 24 varieties of peas, together with a vast amount of hybrid material not yet fixed in type. With this foundation on which to work, Sir Charles Saunders developed Marquis wheat.

Dr. William Saunders was a great administrator. Those who knew him loved him. He was always kind and considerate, never petulant, but quiet, firm, endowed with excellent judgment of both men and affairs. There was no impetuosity or desire for exaggeration in his character. His regard for the truth in all things was an inflexible characteristic, and he was a strict disciplinarian. He had a fine respect for the public purse, which at the time the farms were started, was an essential attribute, for otherwise the system might have been wrecked in its infancy. In looks Dr. Saunders personified the benevolent savant that he was.

### Favors Ceremonials

Thinks Canadian Mayors Would Be More Impressive in State Coach

Canadian mayors would be much more impressive people if they covered up their business suits with ceremonial robes and rode about in a coach-and-four instead of a prosaic automobile, thinks Councillor R. J. Hall, lord mayor of Liverpool, who visited Toronto recently.

Councillor Hall does just those things in Liverpool and when he is anywhere he rides in a gilded state coach preceded by a liveried attendant and a sword-bearer—all to show he takes precedence over anyone in Liverpool or visits Toronto recently.

"It's far more impressive than walking in a room in a plain, ordinary suit and saying you're the lord mayor," he said, "but then, Canada is a fresh, young and very democratic country."

### New Society in Japan

Beard Growers Enrolled And Over 100 Men Enrolled

Whiskers, beards and mustaches of many shapes and sizes were on display in Tokyo when their owners gathered from all parts of Japan and Korea to organize a national society dedicated to the fostering of "beautiful grooming" among old men. More than 100 men, whose ages averaged 70 years were enrolled. Only a few black beards were in the lot, no reds, but plenty of greys. One mustache originated beneath its owner's nose, then swooped out about eight inches to his left and right, looped and ended with a tip in each ear. The record beard, owned by Nobuhiko Kato, 72, was five feet long. He calls it "White Falls," and to keep it off the ground he carries it in a bag when he walks.

### A Natural Dialke

Is Main Reason Why Children Will Refuse Spinach

According to the Detroit Free Press, the Yale University professors think they have found out why some children refuse to eat spinach. They say that while the weed (or word) ranks high in iron, calcium and protein content, analysis shows that only 30 per cent of the iron, 30 per cent of the calcium and 68 per cent of the protein is utilized by the human body. This no doubt, is quite horrible, but we know even a better reason. The kids just don't like the taste of the stuff.

### Starts Flying Mission

Using his aeroplane, Silver Wings and a mobile broadcasting unit, Rev. C. D. C. Boulton of Warburg will embark on a "flying mission" to cover the whole of England. Mr. Boulton, who is known as the "flying Curate," aims at reaching the younger generation—"to take religion to them rather than wait until they come to the church."

### Another Province

Vancouver Island Has Ambitions To Become Separate Entity

Vancouver Island as a separate province within confederation is the aim of the Vancouver Island Provincial Association, whose organization was announced recently.

H. D. Twigg, former Victoria member of the British Columbia legislature, is organizer of the association and offices have been opened in Victoria with the purpose of pushing the aims of the new group and organizing the entire island.

Mr. Twigg said provincial status would be sought by constitutional means. He said the island at one time was a separate entity, prosperous with a low debt and large capital assets. Seventy years as a part of British Columbia, he said, had seen depletion of that capital wealth and increasing discrimination against the island in favor of the mainland.

The founders of the association for some months have made a study of sentiment in all sections of the island, it was stated, and immediate steps will be taken preparatory to presenting a case in favor of a separate province before the Dominion government.

### Artificial Radium

New Discovery May Assist In The Fight Against Cancer

Discovery of a form of artificial radium which may help the fight against cancer was described by Mme. Irene Joliot-Curie, Nobel prize winner, in a lecture at the international clinic of the Medical Association in London.

Mme. Joliot-Curie, under-secretary for scientific research in the new French cabinet of Leon Blum, is a daughter of the late Mme. Marie Curie, co-discoverer of radium, used extensively for cancer. She won the Nobel prize in chemistry last year with her husband.

She explained how, by atom-splitting methods, a vast range of chemicals could be given some active properties of radium, and claimed it would be possible to apply these radio-active substances to injections.

Although they cannot yet be produced in sufficient quantities to compete with natural radium for external use, these substances soon will be available in amounts large enough to be administered internally, Mme. Joliot-Curie said.

### Closer Ties

General Smuts Says Hope Of South Africa Is To Maintain Bonds With Britain

General Smuts, South African minister of justice, in a speech at Malmesbury advocated closer ties between this dominion and Great Britain and declared the future of the world lay in the League of Nations.

The League of Nations had "an amazing future" in Ethiopia, he continued. Ethiopia had depended on the league vainly. Nevertheless, he thought it was only through such an alliance of nations that peace and goodwill could come in the world.

The league, he added, would have to be the founder of a new society built on the world civilization of the future.

### Biggest Store For Men

Shop In London Will Carry Everything A Man Wants

The biggest men's store in Europe, Simpson, Piccadilly, Ltd., opens its doors to the public in London shortly. As its name suggests, it is in Piccadilly, a few yards from the circus, a handsome new building on a site which only a short time ago was a mysterious labyrinth of scaffolding and planks.

The new store has nine floors each of 11,000 square feet and a man can buy everything he wants from a dog to an airplane.

There is a snack bar, a liquor bar, a flower shop, tape machines to give the latest news, a barber's shop, a bureau where you can make reservations for the theatre or a cruise, and a department where you can buy a dashboard or a above-half-penny board.

The only concession to femininity is a gift shop.

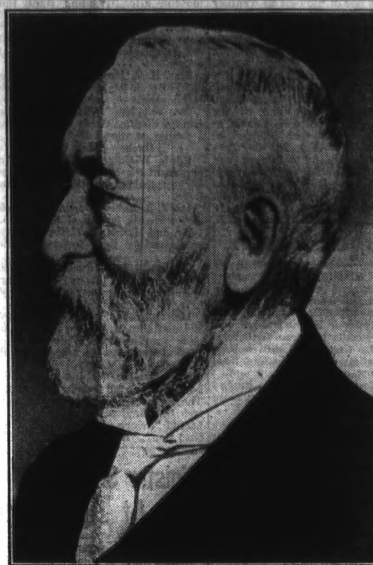

### Oriental Duplicity

"The wily Chinese is peculiar," but a Japanese city's name has been changed to Macleodfield so that its goods it produces can be sold in the British Empire as "Made in Macleodfield," an English city well known for its silk products. Similarly Japanese matches are made in a village named Sweden, so that they can be sold as "Made in Sweden."—Brantford Expositor.

First Gossip—"The vicar's wife said she heard you talking about her."

Second Gossip—"How dare she! I always make quite sure she isn't with earshot."

Saskatchewan is the world's greatest wheat-growing province.

Dr. William Saunders, who was the first Director of the Dominion Experimental Farms, which were established 50 years ago. He was born June 16, 1836 and died in 1914.

### Population Figures

Java Has Over Eight Hundred Persons To Square Mile

In an area of approximately 54,200 square miles, Czechoslovakia has a population of 14,600,000.

Half of Australia's population of 3,500,000 lives in capital cities and towns. The remaining 35 per cent live more than half the produce of the Commonwealth.

The Philippines, with all their 7,083 islands, have an area of only 114,000 square miles, or about that of the state of Arizona. The population of the Philippines is almost 22,000,000, while Arizona has only 435,000 inhabitants.

Belgium supports a population of more than 8,100,000 on an area of only 11,740 square miles.

Java is the most thickly populated country in the world. It has 821 persons to the square mile.

More than one-fifth of the local population of England and Wales live in Greater London.—National Enterprise Association.

### Land Canoe Is Latest

Runs On Four Wheels And Is Propelled By Oars

Now all landlubbers who would like to row but are afraid of drowning can satisfy their wish on land. But they'd better be careful of automobiles.

So far only boats have been rowed, but Umberto Bozzoli of Rome has invented a land vehicle which is propelled by oars.

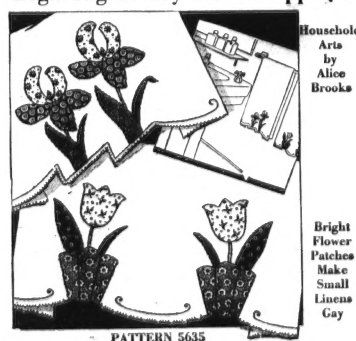

The "land canoe," as the inventor calls it, consists of a small canoe seating one person, placed on four wheels. Two oars, one on each side of the "boat," propel and steer the contraption.

### Call It A Deal

The Investment Dealers' Digest says a partner who censors the salesman's outgoing letters quotes from this one: "I can offer you these bonds at 90. If I do not hear from you I shall conclude that you do not wish to pay more than 85, so in order to save both your time and mine, I will accept that price."

Nearly one-third of the 9,000 street names in Greater Berlin are duplicated.

### Begin Right Away On This Applique

Picturesque iris—vivid tulips in sturdy pots! And you can have your own "fleur-de-lis" variety indoors, all the year 'round! It takes but a bit of needlework gardening, or "applique" to make them bloom gaily along a towel or pillowcase border, or on a dresser scarf. Just idle scraps make the simple patches, and a bit of floss, their outline and stems. You'll also want to save both your time and mine, I will accept that price."

Nearly one-third of the 9,000 street names in Greater Berlin are duplicated.

The new store has nine floors each of 11,000 square feet and a man can buy everything he wants from a dog to an airplane.

There is a snack bar, a liquor bar, a flower shop, tape machines to give the latest news, a barber's shop, a bureau where you can make reservations for the theatre or a cruise, and a department where you can buy a dashboard or a above-half-penny board.

The only concession to femininity is a gift shop.

Oriental Duplicity

"The wily Chinese is peculiar," but a Japanese city's name has been changed to Macleodfield so that its goods it produces can be sold in the British Empire as "Made in Macleodfield," an English city well known for its silk products. Saskatchewan is the world's greatest wheat-growing province.

There is no Alice Brooks pattern book published.

## Story Is Told Of Aid Given American Legation In Addis Ababa By British

### Capture Sea Serpent

Strange Creature Discovered On Beach At Pacific Coast

A 12-foot 1,300-pound "sea serpent" discovered on the beach near Aberdeen, Wash., was being examined by a zoologist, D. W. Black of Baltimore, and his two assistants.

Black said the creature faintly resembles reconstructed skeletons of prehistoric animals. The creature has a head similar to that of a goat, eyes eight inches apart and deep-set like a pig's, and heavy, sharp teeth. The nose is missing, but the distance from the crown of the head to the end of the snout is 14 inches. The body is tapered like a buffalo's, with a four-foot tail like that of a muskrat.

With heavy and oily skin, the creature has 14 ribs, each about an inch and a half wide and four inches apart.

Black said that in 16 years of research he never saw such an animal before. Two years ago a "sea serpent" was washed ashore near Prince Rupert, B.C., but he turned out to be a wax-noose shark.

### Trying Out New Idea

Traffic Violators In Winnipeg Admonished By Travelling School

Embarrassed pedestrians and mortified motorists, guilty of traffic-law violations, blushed for shame as a travelling traffic school moved up and down Portage avenue, Winnipeg's "main stem."

Equipped with a loudspeaker, a police truck, painted bright scarlet, moved slowly along the avenue. An eagle-eyed constable kept watch for day-walkers and errant motorists, admonishing them with a stentorian voice.

A stolid teamster started across a busy intersection. The loudspeaker roared: "You were late in crossing there, teamster." To an erring automobile driver: "You went against that light." Flushed necks were the rule along the route of the truck.

Straying pedestrians were warned to everyone within blocks could hear it—to cross the street only at intersections.

### Alarm Tins 'Phone Talk

Device Gives Warning, Hair Minute Before Time Is Up

It no longer is necessary to watch the clock to avoid extra charges in telephoning. When the telephone operator announces that the three-minute interval is up, sometimes persons are in the midst of a conversation that cannot be finished without an extra fee.

An ingenious telephone call-time has been devised which warns of the approach of the end of the call. The device consists of an hour-glass arrangement which rings a bell at the end of two and a half minutes. The half-minute which follows before the end of the telephone period should be long enough to finish the conversation. The phone call alarm which was shown in Germany at the Leipzig fair is devised for world-wide use, as the limit for telephone call is three minutes in virtually every civilized country in the world.

### Continue Work In North

Dominion Geologists To Carry On Investigations In Saskatchewan

Two Dominion geological parties will operate in northern Saskatchewan this year, one in the Rottenstone lake area, and the other at the eastern end of Lake Athabasca at Fond du Lac.

Dr. F. J. Alcock of the department of mines, Ottawa, will be in charge of the work at Fond du Lac. Early this spring representations were made to Hon. T. A. Crerar, minister of mines, to have work continue in the north and as a result of these representations the federal government has agreed to send these two parties in to continue investigations.

### Revert To First Principles

If the benefits of Christianity were taken away, in less than three generations, men would be like beasts and gangsterism would spread through the community, crushing out those unable to resist power, declared Major H. A. Proctor, member of the British House of Commons, speaking at the Ontario convention of the Church of Christ Disciples, London.

### Score Was Even

Col. Lynn Black, superintendent of the Ohio State Patrol, noticed an auto whose tail light was not burning. He pulled ahead of the driver. "Now, don't tell me you didn't know your tail light was out," began Black, reaching for a traffic summons. "But, but, but," said the driver, a motorist. "And it was," admitted Black afterwards.

Seventy per cent. of all wire imported into England comes from its possessions.

An interesting story is told of the manner in which aid was given to the American Legation in Addis Ababa by British troops before the triumphal entry into the city by the Italians. The Legation in Addis Ababa were impelled by Italian Abyssinians before the arrival of the Italian troops. American newspapers were greatly excited over the efforts made on behalf of the United States Legation by the Sikh guard of the British Legation; and the American Ambassador has revealed how British assistance was solicited. The two Legations were only five miles apart; but the Americans were beleaguered by a murderous rabble and no message could be sent direct. However, with a small portable wireless set the American minister got in touch with one of his country's warships, who relayed it, via the Philippines, to San Francisco and Washington. Washington, got on the trans-Atlantic telephone to the American Embassy in London; Mr. Bingham rang up the Foreign Office; and five minutes later Sir Sidney Barton in Addis Ababa was making his dispositions for the relief of the threatened Legation.

The story was fully and generously told by Mr. Bingham at a Guildhall dinner. He explained that when the news of the American Legation's danger reached Sir Sidney Barton the British forces were engaged in beating off an attack upon the Belgian Legation, which lay next door. There were perhaps some 3,000 "fugues" within the compound of the British Legation. If the Belgian Legation were taken it meant the slaughter of many people, but the very moment that that attack was beaten off an armed convoy went to the rescue of the American minister and his wife and the American zone in our Legation. "That is just a fundamental fact. It happens, and always will happen. It has been our privilege to extend that kind of aid. On this occasion it came unhesitatingly. It came easily. It was not it would come—immediately, sympathetically, brave, and resourceful."

The King, who received from Mr. Bingham the thanks of the American President, sent his own congratulations to Sir Sidney Barton, the Legation staff and guard. Belgian thanks were conveyed by the Belgian Ambassador, through the Foreign Office.

### Equals European Wood

Newfoundland Timber Is Good But Needs More Care

Newfoundland timber was generally admitted to be at least equal to Northern European wood in physical qualities, but the same care in production was not taken, Jack Miner, chief forestry officer of the department of natural resources, said in a report published following a study of United Kingdom markets.

Chief Forestry Officer Turner said he talked with importers, dealers and users, operators of two coal mines, a paper mill, one newspaper mill, and a number of timber storage yards during his tour. "Newfoundland wood is strong enough for pitprops and structural timbers and gives a big yield of good fibre for paper making. Our spruce and balsam are rated as good raw material."

"Unfortunately, the finished product—pitprops, pulpwood or wood stock—is often not good," the report stated.

While it was "almost unheard of" for a shipment of Finnish or Russian wood to be rejected, some wood was turned down in almost every Newfoundland shipment to the British Isles.

### Change In Surroundings

Plans Under Way Will Be Improvement To Westminster Abbey

A profound change is to come over the surroundings of Westminster Abbey within a comparatively short time.

The statue of King George V, which is to form part of the nation's memorial to his late majesty, is to be placed on a space, which will be cleared of its present buildings, lying between the Abbey and the Victoria tower of the House of Parliament. This will afford a remarkable vista of the eastern end of the Abbey. The scheme involves the demolition of a number of old buildings which have no particular architectural features.

In the neighborhood of the Abbey's western end, Westminster hospital, which has stood there for 100 years, is to disappear. The hospital is to be moved to a much quieter situation, bordering on the Thames, a little farther up the river than the Houses of Parliament. A new hospital, which was purchased for 16,000 (\$30,000); it now has been sold for £350,000 (\$1,750,000).

After working 38 years in one coal mine near Lethbridge, Scotland, William Shillinglaw has just retired.

## Gull Lake Ideal Summer Resort For Vacationists

Alberta's Finest Beauty Spot Has Many Advantages Not Obtained Elsewhere

One of the finest beauty spots in Alberta and an ideal summer resort for vacationists, Gull Lake is again the mecca for a large influx of visitors this year. A check-up of cottages along the beach finds them practically all occupied and the soft, sandy beach, which stretches for over a mile at Aspen, has been most popular with

bathers and swimmers during the recent hot spell. The outstanding feature of this lake is the perfect safety in which children of all ages can paddle and bathe. The clean, sandy bottom has a gradual slope out to about 300 yards before deep water is reached, and parents can leave their "kiddies" in safety and without anxiety.

**Good Camping Sites**  
The government grounds provide good camping sites, equipped with public kitchen and dining room, also both houses with dressing rooms, lockers and sanitary toilet all operated under a capable supervisor. The park includes a fine football ground, a splendid base ball diamond, horse-shoe pitching court, basketball court and swings and teeter-totters on the playground for the children.

A fine parking area is provided and the genial, obliging caretaker J. H. Berg, is ever ready to render assistance to visitors. A service is also rendered whereby found articles left with him are returned to their rightful owners.

A few years ago a government pier was erected, which is most convenient for boats and canoes and affords the opportunity for grown-up swimmers to get to the deeper water quickly.

A diving board equipped with a slide is a popular rendezvous with all bathers. It has been noted that the erection of an up-to-date hotel would be a paying investment, and Laban Sandbrook is the owner of an ideal site on the lake front, which he is willing to put into a company undertaking the erection of a hotel suitable for catering to the tourist trade.

Easy of access, Aspen Beach is

served by one of the best all-weather gravelled highways in the province, and is a very pretty drive, only eight miles from the main Edmonton-Calgary paved highway running through Lacombe. It is also served by a branch of the C.P.R.

Vacationists who are golf enthusiasts can enjoy their sport on a course recognized as one of the prettiest and finest golf courses in the West, at Lacombe. Studied on each side with trees, the fairways give a keen delight to golfers, and the natural hazards keep the players keyed up to the last hole. Those who have played over it are loud in its praise.

### Aspen Beach

**ASPEN BEACH.**—The Park sports grounds was a busy place on Sunday, no less than four baseball games being played on the well laid out diamond. Jessie Fernie and her out-stander Gull Lake softball team played the first game with a team from Bentley, easily defeating them by a top-sided score.

In a close game, Lacombe Juniors won from Gull Lake boys by a score of 21 to 19.

**'Twas a Great Game**  
The third game provided lots of excitement, when a game of hardball was played between Lacombe and Gull Lake, the visitors taking the long end of the score, 12 to 5.

In the evening another game of softball was played between Gull Lake and boys from Jackfish, the home team winning by a good margin.

**Recent Arrivals**  
Recent arrivals at the Beach here: Mr. and Mrs. R. Capstick, Mr. and Mrs. Grace, Mr. and Mrs. H. J. Johnston, all from Camrose; Mr. and Mrs. H. Goldberg, Mr. and Mrs. Ze-man, Mrs. Fradkin and Mr. and Mrs. J. A. Whistleroff, Calgary; Mr. and Mrs. J. Edgar, Mrs. Frank Newson, Mr. and Mrs. M. E. Osborne of Edmonton.

Dr. and Mrs. Richardson of Calgary have arrived at the Beach to spend the summer at their cottage, "Rest Haven."

Mrs. M. I. Lieberman is spending a few days at Gull Lake, visiting Mrs. I. R. Friedman.

Aspen Beach is proving quite popular with Saskatchewan vacationists, among them being Prof. A. Anstensen and Mrs. Anstensen of Saskatoon, Mrs. J. B. Mawdsley and family, Mrs. E. F. Hughes and Mrs. Twiss from Luseland, Sask.; Mr. and Mrs. Duncan, Mr. and Mrs. Lamas-urier and Mr. Thompson from Rose-town, Sask.

**At the Cosy**  
Visitors at the Cosy Tourist Re-sort are: Mrs. Dunn and Mrs. Skel-ton from Calgary; Mr. and Mrs. Becker and family from Rimby; Mr. and Mrs. Turner and family, Messrs. Perry, Baxter, Kydd, Moran, Coole, Davis and the Ling family.

**Registered at the Government**  
Camp grounds are: Mrs. R. Phares, Mrs. W. Short and daughter Nora and Jean Kocker, all from Clive; Gordon Wells, Eugene Beaudry and Dick Adams, Edmonton; Mr. and Mrs. Carl Blakeney and son Austin from Sedgewick; Mr. and Mrs. G. E. Stinton, Kansas City, U.S.A.; Mr. and Mrs. A. Bloomer and daughter from Vancouver; Mr. and Mrs. A. C. Lister, San Francisco; Mr. A. Drummond and R. Morris, Minneapolis; Mr. Leslie Finch and George Watson, Ponoka.

**At Aspen Beach Club**  
Registered at Aspen Beach Club are: Mr. Guy Fisher, Otis, H. C. Chappin, Castor; H. R. Chapin, Colonsay, Sask.; Mr. and Mrs. J. A. Sloan, Calgary; Mr. R. A. McCreadie, Edmonton; Mrs. Steinbach and daughters, Mrs. L. L. Cairns and daughter Mary Glenn.

Mr. and Mrs. R. B. Good have returned to Calgary after spending the past two weeks at the Beach. Mrs. Lendrum has returned to Ed-

monton after spending some time at the Lake.

Mrs. Marian Forester, who has been visiting with Dr. and Mrs. T.H. Forester, returned to Edmonton on Saturday.

Mrs. E. R. James, who has stayed at the Beach for some time, returned to her home at Ponoka on Monday. Mr. and Mrs. Wilfred Hunt and family of Blackfalds are spending a couple of weeks in "Idylwild."

Head Coach Steve Vlahi, Eddie Wiseman and Tommy Anderson of the New York Americans hockey team spent Sunday at the Lake.

Mr. J. R. Sweeney spent the week-end with his family at the Beach. Dr. and Mrs. M. E. Tiffin of Edson are spending their holiday at the Lake.

Mrs. D. F. Lebeau and family and Charles Carson from Vulcan are spending the summer at their cottage, "Tarrymore."

Mr. and Mrs. H. Van Marren and Mr. and Mrs. M. G. Van Marren and their families left Wednesday for Wetaskiwin after spending a couple of weeks in "Ozology."

The Hyndman children are the happiest on the beach these days.

They recently became owners of two fine ponies, one a Welsh pony named "Prince Charlie" and a Shet-land pony, "Kelpie."

## Minister Shanghaied At Gull Lake

By V.R.M.

While white sails laced in the blue distance of Gull Lake last Sunday and the merry shouts of surf bathers mingled with the hum of the motor boats at Brownlow's Landing, Harry, popular host at the Landing and veteran fresh water skipper of Alberta, took time off to tell interesting yarns of the early days on Gull Lake when a company of Gentlemen Adventurers (known as Messrs. Brownlow, Puffand Thorp) navigated her waters with their worthy craft, the "Sea Gull."

Built in Peterboro, brought to Edmonton by the Peace River Transportation Company and later ceremoniously launched at Gull Lake on June 10th, 1900, the Sea Gull was for many years mistress of the lake. Sturdily fashioned of oak, 32 feet long with an 8-foot beam, she was the first steam boat to breast these waves and on many happy occasions she made her cruise loaded to capacity with pleasure seeking passengers.

**A Memorable Day**  
For one such auspicious event, the Sea Gull had been chartered by the late Hon. W. H. Cushing, M.L.A., from Calgary to accommodate a Sunday school picnic. It was in 1908 and the arrangements between the Honorable Mr. Cushing, then Minister of Public Works for Alberta, and Mr. Brownlow were made only recently installed Bell Telephone system. During this conversation it was specified that the cruise was to occupy one half day at the regular price of \$6.

At the appointed time, Mr. Cushing, accompanied by the Rev. A. S. Tuttle of Edmonton and about 35 others, arrived at Aspen Beach. The Sea Gull lay at anchor 60 rods off shore and the passengers were conveyed to her by rowboat. The weather was ideal, the lake like mirrored glass, and all went merrily with the excursioners. At sundown the party was safely set ashore by the mate, "Cappy" Thorp of Bentley. Only the Reverend Tuttle, commissioned to make financial settlement for the trip, remained aboard.

**They Couldn't Agree**  
A serious disagreement as to amounts arose between Skipper Harry Brownlow and the reverend gentleman and the skipper refused to allow Mr. Tuttle to be taken ashore until satisfactory settlement had been made.

The story, of course, became known, and some merry wag, away back in the new-born 20th century, took it upon himself to compose a ballad to the occasion.

The first section of the only available copy of this ballad has been destroyed, but what remains of it is printed below.

Then the landsman placed the "four-plus-some"

In the sailor's honny palm

And turned to rejoin his friends on shore,

To chant the evening psalm.

But the sailor called him back to his side,

"There's some mistake," quoth he, "You've given me four instead of six,

As we agreed 'twould be.

Then the parson explained with easy grace

That after the joys of the day

The but had been passed and "four-plus-some"

Was all that the group would pay.

The skipper snorted and puffed his pipe

And swore as a skipper can

That six was the sum and six 'twould be

Or the parson would never land.

Then the mate came aft and pleaded with him

To let the good man go free,

But the skipper grasped the helm of the "Gull"

And headed her out to sea.

Then the parson glanced at the dimming shore

And his face grew long and sad,

He glanced at the wide blue field ahead

And swore that the man was mad.

He nervously reached for his wallet

And the Captain waxed full gay

As he tucked the bills in his sea-man's coat,

And the good man rowed away.

## Sport-Scope

By JACK McCAUGHERTY

Owing to financial difficulties, the Wetaskiwin Indians have fallen through for week, hoping for them in action in the Northern Baseball loop. But there will still be plenty of fireworks in the league. In their place come the Calgary Mustangs and there's no doubt that the southern city boys will not only be able to take everything the Edmonton and Ponoka teams have in store, but that they will also have plenty of their own to "dish out." All the games played before the reorganization of the second half of the league have been thrown out and a new schedule has been drawn up.

According to Alfred Shrub, one of the greatest middle-distance runners England has ever produced, Canada "hasn't a chance" in the Olympic games at Berlin. Now, some of us may agree with Shrub and some of us may not. However, whether we do or not, one thing is certain—that we are all out there pulling for them, hoping for them and wishing them the success in the world to bring the maple leaf out on top.

The local White Sox are at it again! The boys added another win to their credit on Friday night when they turned back the Bentons 4-3 in a five-inning game. This totals their wins at nine in twelve games played, which again jumps them to a 750 percentage.

Proving themselves supreme by turning back all opposition, the Calgary players made a clean sweep of all major trophies in the Alberta tennis tourney at Edmonton last Saturday. The Edmontonians got only a few glances at the final, and these were from the sidelines—for the southern city defenders made play which was not far from perfect.

Calgary's Bill Stark again smashed his way to the men's singles title when he gave Doug. Gunn of the same city little chance in their three sets with a 6-3, 6-4, 6-3 triumph. The women's singles was also an all-Calgary final. In this event Mrs. Marjorie Eustace banged the ball in great style for a 7-5, 7-5 victory over Ruby Roberts. Paired with Ernie Anderson, Mrs. Eustace shared in another win in straight 6-3, 6-3 sets against Bill Harrison and Mrs. Johnson of Edmonton. In the women's doubles, the Calgary queens again came out on top, this time with a little tougher opposition. The Roberts sisters, Ruby and Dot, finally won 6-3, 4-6, 6-3 from Bessie McAvoy and Mrs. Johnson. The second time when Stark and Gunn came up they combined to form the power which captured the doubles crown by defeating the Harrison-Mitchell combination of the capital city.

And didn't youthful Ken Black upset the dope in the Vancouver \$5000 Jubilee Golf Tournament! The 24-year-old amateur shotmaker of the Shaughnessy Club scored above all the "big shots" with his winning aggregate of 275 to take the top prize. His score was 13 below par! The home-town boy set a blazing record in his first 18 holes when he carded a 63 on the par-72 course.

**DID YOU KNOW THAT . . . ?**  
Jack Church, Regina defence star, has signed a two-year contract with Toronto Maple Leafs of the National Hockey League. . . Four men clicked on a \$3,200.40 return for a \$2 bet in the daily double at Boston.

### Father Lacombe and Rev. J. MacDougall Honored by Cairn

WETASKIWIN. — Indian chiefs, counselors and braves, resplendent in brilliant head-dresses, insignia of their rank, and richly beaded buckskin, but without the war paint of a former day, attended the solemn memorial to Rev. Father Lacombe (in whose honor the town of

Lacombe was named) and Rev. John MacDougall, peace makers of the western plains, at Wetaskiwin on Thursday, July 23. The cairn is the last of a series and Rev. John MacDougall, peace makers of the western plains, at Wetaskiwin, Thursday, July 23, of 14 erected in Alberta under the direction of the Historic Sites and Monuments Board of Canada. It was stated by His Honor Judge F. W. Howay, LL.B., F.R.S.C., member of the board who attended the ceremony, that the cairn is a fitting memorial to the two men.

### Bentley

BENTLEY.—Mrs. Helen of Medicine Hat is the guest of her sister, Mrs. C. H. Henry.

Miss Mary Bailey of Calgary is the guest of Miss Edna Evernden at her home here. Miss Evernden will return to her duties at the Holy Cross Hospital at Calgary the first of August.

Mrs. Ethel Davidson, with her daughters Patricia and Audrey of Field, is spending holidays with Mrs. Davidson's father, J. B. Blish, and other relatives.

Mr. Ogle Johnston was a business visitor to Calgary last week.

Mr. and Mrs. Ed Leiske and children leave Tuesday by motor for Couer d'Alene, Idaho, for a visit with relatives.

On Friday evening last, this district was struck by a severe electrical storm. The power line was cut from the station during the first part of the storm by lightning and the village was lightless until about 8 p.m. Saturday. Hail fell for only about five minutes but left its mark on gardens and berry patches. Rain was a welcome adjunct, as it was badly needed.

Phyllis and Marjorie Garnett are up from Calgary to spend holidays with their grandparents, Mr. and Mrs. F. W. Thorp. They are accompanied by their aunt, Miss Betty Garnett.

Mr. and Mrs. Hepburn and family of Ponoka were Sunday guests last week with Mrs. Hepburn's sister, Mrs. H. Dickson. Miss Dorothy Dickson returned with them.

Mr. and Mrs. Smith of Castor were visiting Mrs. Smith's son, Mr. Henry Castleman, and family, of the Outlet district, last week.

Mr. and Mrs. Harrison Witte and son of Halkirk and Miss Helen Witte were Sunday guests of Miss Helen's mother and sisters here.

Linda Weise is spending holidays with her grandparents at Lockhart.

Born at Bentley Hospital on Wednesday, July 22, to Mr. and Mrs. Harold McIntyre of Fraspur, Alta., a daughter.

Californians Conduct Services. Mr. and Mrs. Vernon and Mr. Patmore of Los Angeles, Calif., and Miss Dorothy Erskine, teacher in the Bible School at Saugus, Calif., conducted the services at the Pentecostal Church on Sunday evening.

Services will be held on Wednesday evening and each evening following during the week. Miss Erskine, who was raised in the Durham district, is visiting her parents after an absence of two years. Old friends here will be pleased to hear of her success.

Mr. and Mrs. McCready of Edmonton were week-end visitors at the John Rae home. Mr. McCready returned home on Monday but Mrs. McCready remained for a longer visit. Mrs. Rae and Mrs. McCready are sisters.

The marriage of Miss Nancy Johnson of Bentley and Mr. Tom Gibbons of Blackfalds took place at the Presbyterian manse, Red Deer, on Tuesday, July 21, Rev. Hugh Jack officiating. The young couple were accompanied by Miss Jessie Fernie of Aspen Beach and Mr. Tom Gibbons of Blackfalds. A wedding dance was held at Spruceville Hall on Tuesday evening, July 21, at which the young couple were the recipients of many useful and pretty presents.

On Monday evening previous to the wedding, Miss Florence Woolgar was hostess to about 35 ladies of Bentley and district at a miscellaneous shower in honor of Miss Johnson, at which she received many nice gifts. Following the presentation of the gifts, contests were staged and lunch served. The young couple left on Thursday for the groom's farm near Winfield, where they will reside. Mrs. Johnson and Jack accompanied them for a short time.

### Interesting Wedding Takes Place at Tees

A wedding of much interest to a large number of friends in central and southern Alberta took place at the bride's home at high noon in Tees on July 17, when Miss Marion Rosabelle Ahern, eldest daughter of Mr. and Mrs. H. G. Ahern, became the bride of Robert Wyman Shannon, only son of Mr. and Mrs. R. E. Shannon of Acadia Valley, Alta.

The Rev. Kettly performed the ceremony under a beautiful bower of green foliage and ferns from Vancouver Island, studded with pink flowers and a large white wedding veil. The bride looked lovely in her wedding gown of gleaming white satin dressings and lace, fashioned on slender lines to the floor, with high neck and close fitting long sleeves; her veil of tulle fell from a wreath of orange blossoms and she carried a bouquet of sweet peas.

Miss Florence Ahern, who attended her sister as maid of honor, was charming in a frock of tea rose satin and carried delphiniums and daisies. Mr. George Reid of Clive assisted the groom as best man and Miss Ardree Reynolds of Tees, B.C., played Mendelssohn's wedding march for the wedding party, which entered the long, spacious living room from the stairway, and played softly during the signing of the register.

Reception in Held. Following the ceremony, a reception was held, with only the immediate friends and relatives being present; the rooms were tastefully decorated in summer flowers and white carnations, ferns and pink roses, the wedding table being beautifully decorated with bowls of white and silver ribbons at the four corners, joining the chandelier above.

The four-tier wedding cake was the centre of interest, the base of which was banked with pink peonies to match the tall pink lighted tapers in pink flower candle-holders.

Following the dinner the young couple left by motor amidst showers of rice, confetti and good wishes for a honeymoon at Banff, Lake Louise and parts of B.C. On their return they will make their home at Acadia Valley, Alta.

Two women, passing a butcher shop, noticed a pig's head on display with a lemon in its mouth.

"That reminds me," said one, "promised to get a new pipe for Joe."

Mr. and Mrs. Marshall are receiving congratulations on the birth of a daughter last week.

District Hit by Hail. Hail took a large strip of this district last Friday night.

The Busy Bees are holding their regular monthly meeting on Wednesday, August 5th, meeting in the evening at Spruceville.

Mrs. Myrtle Fife of Honolulu is visiting with her cousin, Mrs. C. C. Burton.

Miss Esther Hug is visiting at her home for a few days.

Mrs. Proudfoot and Mr. and Mrs. Harvey Proudfoot have left for Roseburg to visit with Mrs. Shepler, daughter of Mr. and Mrs. J. A. Proudfoot of this district.

Mrs. Benton of Hafina is visiting with her mother, Mrs. Gottschick.

A story has just emanated from Broadcasting House, London, of an old lady who had never had a radio and consistently refused to have one. But at last she was persuaded to hear one in her home. The demonstrator switched it on and the effect was pleasing.

"That's a very nice tune," said the old lady. "Play it again."

"But, madam, we can't play it again."

"Then you can take that machine away," she firmly observed.

### The Churches

#### THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe Incumbent: The Rev. W. E. Herbert Licensed Lay Readers: E. H. Jones, K.C., and A. T. Inskip

Organist: Miss Alice Inskip Aug. 2—8th Sunday After Trinity, 10:00 a.m.—Sunday School, 11:00 a.m.—Morning Prayer and Sermon

7:30 p.m.—Evening Prayer and Sermon. Thurs., July 30—Male Choir Practice under the leadership of Mr. J. Henry-Lewis, 7:30 p.m.

Fri., July 31—Regular Choir Practice, 8:30 p.m.

CHRISTIAN SCIENCE At all Christian Science churches next Sunday, the subject of the Lesson-Sermon will be "Love."

The following is one of the Scriptural quotations contained in the Lesson-Sermon: "And he answering said, Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbour as thyself" (Luke 10:27).

One of the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is as follows (page 9): "Dost thou love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind? This command includes much, even the surrender of all merely material sensation, affection and worship. This is the El Dorado of Christianity."

ST. ANDREW'S UNITED CHURCH Rev. R. B. Layton, B.D., Minister Services at 11 a.m. only for the next few Sundays.

Organist: Miss Alice Inskip "O worship the Lord in the beauty of holiness."

### Spruceville

SPRUCVILLE.—The regular monthly meeting of the U.F.W.A. local will be held at the home of Mrs. H. E. Heide Wednesday afternoon, August 5th. The roll call will be answered by a "favorite quotation."

The two delegates to the Farm Women's Best Week at Oids will give their reports. There is a great treat in store for anyone attending this meeting, as Mrs. Irene Parry, who served this constituency for 14 years, is going to give an address on "Is An 'Isolation Policy' Possible for Canada?" This is a very vital subject at present when the possibility of war is being freely discussed.

Mr. and Mrs. Marshall are receiving congratulations on the birth of a daughter last week.

"That's a very nice tune," said the old lady. "Play it again."

"But, madam, we can't play it again."

"Then you can take that machine away," she firmly observed.

### Daughter of Former Lacombe Secures Honors in California

Many old-timers in the district will be interested in the following announcement which appeared in a recent issue of the Long Beach (Cal.) Press-Telegram:

"Miss Doris Elizabeth Wallentine, who last week graduated from the University of California, Los Angeles (U.C.L.A.) with a Bachelor of Arts degree, left this week, accompanied by Miss M. L. Mason of Pasadena, for two months' vacation in Mexico City. Besides seeing points of interest, Miss Wallentine will be enrolled at the summer session of the University of Mexico. Miss Wallentine is the daughter of Dr. and Mrs. Nathaniel R. Wallentine of Long Beach."

Mrs. N. R. Wallentine was formerly Miss Sophie Ross, daughter of the late Mr. and Mrs. Duncan Ross, who were among the earliest settlers in the Lacombe district and will be remembered by many old-timers. She received her early education in the Lacombe school, later teaching in the Lakeside, Bentley and Lacombe schools and in Calgary, where she taught in school of which Premier Aberhart was the principal.

It is high time Spaniards left off shooting each other.—Senor Azana.

I hope that one political party will come out squarely either to reduce the powers of the United States Supreme Court or to increase the powers of Congress.—Fiorello H. LaGuardia, mayor of New York.

## WORLD HAPPENINGS BRIEFLY TOLD

The skull of the Marquis de Montcalm, governor of French Canada at the time of the British conquest, will be placed on exhibition in a Quebec museum.

The king has given his patronage to the British council, set up to promote closer cultural relations between the United Kingdom and foreign countries.

It was authoritatively stated Australia will accept the plans of the British government for a bi-weekly flying-boat service between Singapore and Port Darwin. It is planned to begin service August, 1937.

Unemployed in the United Kingdom declined by 126,188 in the period from April 27 to May 25. It was announced, insured employees as of the latter date totalled 10,831,000, an increase of 120,000 over the month.

Frank Bernard and Fred Schraeder of Edmonton, both blind, have made a model of the liner Queen Mary. On a scale of one inch to 20 feet, the model is 41 inches long and complete in every detail.

Negotiations are afoot looking to a faster and better steamship service between Canada and Australia and New Zealand. Hon. W. D. Euler, minister of trade and commerce, told the House of Commons.

J. R. Burbridge, junior city clerk in Halifax, earned \$920 last year and won a \$90 increase. This put him over the \$1,000-a-year class, where he was subject to a 10 per cent cut. Now he draws \$909 a year.

Plans for a flight across the South Atlantic in a free balloon were being made by Dr. Zinner, famous Hamburg pilot. The 3,700 miles between Casablanca, Morocco, and the mouth of the Amazon river can be covered in from five to eight days with prevailing winds, the balloonist said.

Manitoba is free from grasshoppers this year, for the first time in five years. H. E. Wood of the provincial department of agriculture stated recently. He said that \$50,000 voted by the legislature for a poison-bait campaign will not be needed.

## Preserving B.C. Landmark

Directional Finder Will Be Carefully Guarded in Future

A block of stone engraved with lead letters, left at Wilson's, B.C., in 1895 by the crew of H.M.S. Egger, to determine longitude and latitude, has been uncovered near the sunset gun in Stanley Park.

The stone, buried under moss and gravel, was formerly used to correct errors in ship's instruments but fell into disuse and was completely forgotten.

Inscribed on the stone is the exact longitude and latitude of its position with a note it was placed there by the Egger, historic British survey ship.

The mark is badly worn by feet of careless visitors who were unaware of its historic relic hidden beneath them. Steps are being taken to preserve the landmark. A protective barrier of chain and concrete will be erected around it or it will be raised on a stone pedestal surrounded by a small garden plot.

## Marine Broadcasting Station

Latest Radio Equipment Integral Part of Belfast Liner

According to the London Times, a new liner is now being built at Belfast which will have as an integral part of its equipment a complete broadcasting station. It will have not only an adequately powered transmitter of latest, most up-to-date design but specially constructed broadcasting studios and a special personnel for the purpose of planning and producing programs for the benefit of listeners ashore. The name of the ship is the Kanibila.

When completed, it will sail from Belfast to its home port in Melbourne, Australia, where it will be put into active service between Adelaide, South Australia, and Cairns, North Queensland. The Kanibila will be the first marine broadcasting station to be licensed by a government to transmit entertainment on regular schedules for listeners on land.

## Empire Names For Engines

"Empire" names have been chosen by the L.M.S. Railway for the locomotives of the "Jubilee" class, 49 of which are being constructed in the company's works in England this year. More than 80 of these engines will bear the names of the Dominions and Colonies of the British Empire.

When folks get as much enjoyment out of a new home as they do out of a new automobile, there will be more new homes.

## Many Memorial Plans

Late King George V. Will Be Immortalized All Over Empire

The late King George V. will be remembered through the ages. There have been 200 suggestions for memorials, aside from statues.

Among the leading suggestions for a "philanthropic" national memorial to the late king are:

Acquisition of land for a national park.

Homes for old people throughout the nation.

A medical research fund to include the provision of radium for cancer.

Hostels for young men and women seeking employment far from their homes.

(The money for the philanthropic memorial will be raised through public subscription.)

In addition, many towns and cities throughout Great Britain are selecting memorials.

It is proposed to have a stained glass window in Liverpool cathedral and a solid granite statue in Aberdeen.

A tablet will mark the spot where King George lay in state in Westminster Hall.

A plaque is being placed on the cottage in Wandsworth visited by the King on one of his jubilee tours. There will be a great statue of King George on a site in London near Parliament Square.

And throughout the empire there will be innumerable statues and memorials to the dead monarch.

In New Delhi, India, there will be a statue approved by the King himself during his lifetime, placed in the centre of Prince's Park.

Charles Jagger, sculptor, died before he finished the carving of the figure, but it will be completed.

The Princes of India are providing this memorial as their contribution to the new winter capital of India where the foundation stone was laid by King George at the conclusion of his Coronation Durbar in 1911.

And in Bombay there will be a memorial infirmary for incurables.

## Believes Sun To Blame

Causes Periodical Fadeout On Short Wave Radio Set

If your short wave radio set mysteriously goes out of commission every 54 days—as all of them do—blame the sun!

Dr. Robert S. Richardson of Mt. Wilson Observatory near Pasadena, Cal., believes he has solved one of the puzzling problems of radio by means of a theory which has been verified by photographic proof.

Brilliant eruptions of gas over sun spots, which occur about every second time that the sun rotates, or roughly every 54 days, are followed by a "dead" period of from 20 minutes to five hours, Dr. Richardson learned.

There was a "fadeout" period Feb. 14 that led to the successful experiment. It was noticeable in England and the United States.

If this theory were correct, Dr. Richardson reasoned that early in April the same phenomenon would occur. He made almost continuous observations from April 6 on.

Photographic plates exposed at 8:47 a.m. on April 6 revealed an unusually brilliant sunspot eruption. Then came a deluge of reports that at the same time radio signs began to fade out.

## Britain Has Hard Problem

Diplomacy Will Be Needed To Settle Trouble In Palestine

The trouble the British Government has run into in Palestine arises in considerable part because its wartime predecessor made too many promises.

At gave pledges to the Jews, and it gave pledges to the Arabs. In practice, if not in theory, those pledges clash.

The result has been a condition of chronic unrest throughout the Holy Land which is getting no less as the years pass, and at the moment is taking the form of something much resembling incipient war.

The British are notable for their ability to smooth away troubles within their Empire and in their spheres of influence, but if they can settle this one satisfactorily, in a way that will produce harmony instead of continuing strife, they may justifiably set up as successors to Solomon the Wise. Detroit Free Press.

History Prof: "Who was Tallyrand?"

Poor Student: "A fan dancer, and cut out the baby talk."

Victim: "Hey, that wasn't the tooth I wanted pulled."

Dentist: "Calm yourself, I'm coming to it!"

## Economic Unity

Thinks World Should Be Divided Into Self-Contained Economic Blocks

A belief the world should be divided into self-contained economic blocks was laid down by Sir Samuel Hoare, newly-appointed first lord of the admiralty and former foreign secretary.

Addressing the Cambridge union, Sir Samuel said: "The British Empire's great and self-contained economic unity is founded on common principles big enough for contentment to grow up within its borders," he said.

"I believe new stability would be given the world if other great units were similarly developed."

Sir Samuel suggested three such blocks should be formed—first, the United States and its American "friends," secondly, a United States of Europe along lines sketched by the late Aristide Briand, former French premier and third, Soviet Russia.

A united empire backed by a strong navy was the formula held out by Sir Samuel as Britain's contribution to peace.

## Lasted Eight Months

Honeymoon Through Australia In Caravan Covered 7,000 Miles

A 7,000-mile honeymoon caravan tour of Australia ended recently—eight months after the bride and bridegroom set out.

The honeymooners were Mr. and Mrs. Francis Birtles of Sydney, and in the course of their trip they travelled up the Australian east coast, across the north and down the centre, through tropical jungle and sandy desert.

Their caravan was fitted with a refrigerator, wireless, a sink with running water, water tanks, and a portable bath. It was as heat and fly proof as it was possible to make it.

Eight months' supplies of groceries were taken by the couple when they started from Sydney. With rod and gun they kept themselves supplied with fish and meat.

The bride had to prepare most of her cosmetics herself. She invented a face cream which also proved useful for polishing the car which hauled the caravan.

## Where Idea Started

Inventor Of Zeppelin Airship Was A German Jew

A fact which has just been revealed by an American writer is that the Zeppelin airships are of non-Aryan stock. The inventor was David Schwartz, a German Jew.

Schwartz had built an airship but illness compelled him to give up further development. Count von Zeppelin was interested in his work, and when Schwartz was no longer able to continue, the Count paid him, and subsequently to the widow, \$75,000 for the patent-rights in 1902.

Cancellor Hitler has issued stern decrees compelling Germans to boycott everything of other than pure Aryan stock as far back as they can be traced, imprisonment, and sometimes death, it is said, following breaches of these ordinances. He pays so much more in prestige for Germany by the Zeppelins, however, that he no doubt turns a blind eye toward the origin of the Hindenburg.—Stratford Beacon-Herald.

## Not Taking Any Chances

Russia Prepared For Panic During Eclipse Of Sun

In 1887 a total eclipse of the sun swept across Siberia and Central Asia, throwing millions of peasants into a panic. On June 19 there was another eclipse visible across Siberia, and the Soviet Government prepared for it by issuing educational films and pamphlets, fearing another panic. Superstition is an offspring of ignorance, and it shows what a slow process it is to destroy the latter.—Ottawa Citizen.

A parachutist landed on a golf course just as a player was in the act of driving his ball. There's nothing like dropping in at tea-time.

The hoatzin, a remarkable bird found in tropical America, has a pair of claws on its wings.

## A Silken Thread

The Tie That Binds Together The Component Parts Of The British Empire

The recent proposal of a prominent American citizen that the interests of Canada and the United States would best be served were the two countries to join hands politically to form one great, powerful and resourceful country, appears to be meeting with little or no response on this side of the long, unguarded international boundary, and this fact will probably surprise many good Americans who consider themselves as our cousins in a broad sense.

Naturally there is a reason for Canadiana being content to remain within the British Commonwealth of Nations, a reason one could hardly expect Americans to appreciate. The reason is that the tie that binds the Dominion of Canada to Great Britain is not an iron chain but a silken thread. At the outset of the development of Canada this country was governed by Great Britain, but as the country developed self-government developed, until finally, under the statute of Westminster, Canada gained full nationhood as a member, with equal status, of the great British Commonwealth. The bond is aptly likened to a silken thread, but there is no disposition to break the slender tie.—Swift Current Herald.

## Record Parachute Jumps

More than 900,000 parachute jumps were made from special parachute-jumping towers in Russia last year, according to figures just issued in Moscow. Russia claims, it is stated, that she now leads the world in parachute-jumping, holding all the records.

The National Greyhound Racing Club of England has more than 45,000 dogs and 22,500 owners on its registers.

## Subscribe To Memorial Fund

Announcement has been made the King and Queen Mary have contributed £1,000 (\$5,000) each to the King George V. Memorial Fund. The Duke and Duchess of York have given £500 (\$2,500) and the Duke and Duchess of Gloucester and the Duke and Duchess of Kent £250 (\$1,250) each.

With reference to that watch on the Rhine, sooner or later somebody's going to get the works.

## MARCH OF PROGRESS

Year by year improvements succeed one another, on the prairies. The ox-cart gave way to the horse and buggy, and the horse and buggy gave way to the automobile, until now aeroplanes are gradually taking over many of the duties of the automobile. The latest step in the line of progress on the prairies is the coming of a powerful, high speed aeroplane ambulance to Regina to serve Saskatchewan, whose sponsors believe will save a great many lives. Preparations for the institution of this new service have been under way for a great many months. In the use of this aeroplane, the patient at a country point is placed on a stretcher, wrapped in blankets and is kept free from the danger of chills until admission to hospital.

Household Arts by Alice Brooks

Colorful Jiffy-knit's Vacation Must Have

PATTERN 5535

"Clickety-click" go the jiffy-knit needles, intent on finishing this lacy blouse in two days' time. Composed of but two identical pieces, needing only side seams joined, you'll find both lace stitch and contrasting plain knit stripes work up quickly. Make this, and the skirt of Shetland floss.

In pattern 5535 you will find complete instructions for making the blouse and skirt shown in sizes 16-18 and 38-40; an illustration of them and of all the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## TO RECALL THE PAST

Just before she started on her long journey to Vancouver to function in the Golden Jubilee ceremonies, Canadian Pacific locomotive No. 374, reconstructed Weston shops, Winnipeg, with her wheels and rods pronounced 100 per cent. efficient, each in its own way. No. 374 is the exact replica of the old engine which hauled the first transcontinental train from Port Moody, B.C., then the terminus of the Canadian Pacific Railway.

With pageantry re-enacting the exact scene of fifty years ago, the coast terminus will hail the arrival of the old train's duplicate at 12 noon on Friday, July 3. Premier Pattullo and the mayors of Vancouver, Victoria and Port Moody will give addresses of welcome to what a Canadian Pacific official representing Harry A. Abbott, who performed the original honors, will reply. At the throttle of the locomotive will be W. H. (Billy) Evans, surviving member of the train crew of 1886.

## Great Progress Made

Montreal Doctor Hopes Eventually To Stamp Out Scarlet Fever

Scarlet fever, number one infectious disease, on the doctor's list, since diphtheria has been conquered, is now generally considered to be no more dangerous than chicken pox or measles, according to Dr. H. H. Cushing, Montreal, who presented a paper on the disease before the recent annual convention of the Ontario Medical Association.

Dr. Cushing warned that while scarlet fever is practically under control with the mortality rate down to one per cent, there is still danger of epidemics of great seriousness.

"If there were no scarlet fever many infectious hospitals would be closed," said Dr. Cushing. The development of tests and anti-toxins by Dr. and Mrs. Dick have added greatly to prevention, diagnosis and treatment, but these are not quite as satisfactory as similar methods used in diphtheria cases, he said.

Dr. Cushing was of the opinion the use of serum for scarlet fever is justified and was optimistic the disease would eventually be stamped out.

"Scarlet fever is practically certain to return in a very virulent form," said Dr. Cushing. "But it is comforting to know we can control the disease with serum."

## Many Years At Sea

Sir Edgar Britten Started His Career In Sailing Ship

Sir Edgar Britten, tooling the Queen Mary out on the high seas, first went to sea in sailing ships 44 years ago. In his youth he jettisoned his middle name, Theophilus, and it seems a pity, for he resembles the Roman Emperor and it was an apt name. Theophilus was an iconoclast and humorist, and so is Sir Edgar.

He has ridden pretty nearly every thing the Cunard line ever set afloat, and was commodore of the Cunard fleet and captain of the Berengaria, among many others. He was knighted in February, 1934, the third of the Cunard staff to be selected for this honor. The others were the late Sir James Charles and Sir Arthur Rostron. The only White Star commodore who has been knighted is Sir Bertalan Hayes.

Last fall, due to the consolidation of the Cunard and White Star lines, there was much uncertainty as to the command of the Queen Mary, with matters of seniority involved. Sir Edgar, ready to retire at 80, was persuaded to sign on for three years more.

"You must be a proud man," says the King to the captain. "I am, sir," says the captain to the King.

He left grammar school to become a sailor on the Barque Jeanie Osborn. He joined the Cunard service in 1901. In 1903, he was given a commission in the Royal Reserve. Multitudes of sea-going folk know him and esteem him highly. He has not only a trim ship and trim person, but a trim vocabulary. He is a great splinter of yarns and given to salty and witty discourse.

## Held Letter Many Years

Then Man Guessed Friend Was Not Coming For It

When Alva Clark left Hoquiam, Washington, in 1914, he asked a friend to hold his mail for him. After holding one letter for 22 years, the friend returned it to the postoffice so that it might be sent back to the original sender, George E. Clark of Doniphan, Mo.

A note, which was written by Clark's friend, accompanied the letter to the postoffice. It said: "I guess Clark isn't going to call for his mail!"

If small grease spots occur on silk materials, as quickly as possible, cover with talcum powder and let stand two days, then brush off with clean stiff brush. Very simple and yet effective.

While trying to wring the neck of a chicken, a man in Talma, New Zealand, let his fingers slip, and the sudden jerk broke his arm.

## On Way To Arctic

British Geologists Will Explore Mineral Possibilities Of Baffin's Land

On his way to Churchill, then to Southampton Island, and the west coast of Baffin's land, where he and four companions will spend the next three years, P. D. Baird, young geologist and graduate of Cambridge University, left Winnipeg recently.

Mr. Baird will be no newcomer to Canada's Arctic wastes, for in 1934 he spent some months on the coast of Baffin land as a geologist. The expedition is travelling under the auspices of the Royal Geographical Society.

While prospectors have gone as far north as Chesterfield, none has yet explored the mineral possibilities of Baffin land's west coast, Mr. Baird believed.

Among minor comforts which the young men are taking with them will be 12 pounds of tobacco, which they have brought all the way from England, and which is packed in airtight cans, and a radio receiving set.

## New Type Of Engine

Turbomotive Drawing Fanciful Royal Scot Uses Super-Heated Steam

A noteworthy innovation in British railway practice took place when "The Royal Scot," the famous L.M. & S. train from Euston, London, to Glasgow Central was drawn by the turbomotive, a new type of engine which has been completed by the Company at their Crewe works.

Developing some 2,000 horsepower with a tender capacity of nine tons of coal and 4,000 gallons of water, the engine uses super-heated steam at a pressure of 250 pounds per square inch.

The turbomotive presents an unusual feature in the almost complete absence of the visible mechanism that characterizes the ordinary express engine. The only visible parts are the coupling rods of the driving wheels.

## Head Of Association

Mrs. Alfred Watt, A Canadian Woman, President Of The Countrywomen Organization

A Canadian woman, Mrs. Alfred Watt, was re-elected president of the Associated Countrywomen of the World at the closing session of the Triennial conference at Washington. Mrs. Watt formerly lived at Collingwood, Ont., and later at Victoria, B.C., but now makes her home in London, England.

In 1910 Mrs. Watt first began organized work among countrywomen in British Columbia and was appointed to the women's board of the department of agriculture.

She went to England in 1916 and continued the organization of countrywomen to the point that 5,000 branches now exist in that country. Mrs. Watt was first elected president in 1933 at Stockholm.

## Barometer Of Temperament

Teeth are a barometer of your temperament. If they have a bluish hue, you're temperamental; maybe even inclined to be neurotic. Yellow teeth indicate a jolly disposition. And pearly white teeth—the kind every one yearns for—are a sign of poor molars.

And speaking of teeth: America's sweet tooth has caused the per capita consumption of sugar in this country to nearly double since 1900.

## Eating More Bananas

Within the last three years Victoria's banana consumption has doubled. The weekly banana diet in the coast city has now reached 40,000 pounds. Regular boat shipments from the tropics are responsible for the increase.

## From Alberta Corn Comes New Industry

Another addition has recently been made to Alberta's industries, which will augment the "Buy in Alberta" policy. This is a broom factory started in Taber, Alta., which in a short time will be in a position to supply the whole Alberta market, without importing from outside the province. The industry has been started on a small scale, but as the demand increases, extensions will be made to meet the demand. Experiments have proven that a very high-class broom corn can be grown in the irrigated district of Taber, sufficient to supply a large market, and it is expected to grow into one of the major industries of the province. It is the only broom manufacturing plant in Alberta using Alberta grown corn, and the product compares more than favorably with imported lines, at equal prices. One of the brooms can be seen at the office of the Western Globe.

## VALUABLE DON'TS FOR SWIMMERS

Swimming in these hot, sweating summer days is a pleasure and enjoyment to all. However, with the newspapers daily reporting drowning fatalities, a few helpful "Don'ts for swimmers" are printed below:

DON'T swim alone. You may become fatigued and no one will be available to come to your assistance in case of difficulty.

DON'T swim for at least an hour after eating. If you do, you may be stricken with stomach cramps, which in almost every case render the swimmer helpless. Muscle cramps are not so dangerous, and in most cases of these, providing you do not get excited, you can get them out by relaxing. Make for the shore at once, where the cramped member can be massaged. If you are subject to cramps, stay close to shore on all occasions.

DON'T go on long swims unless accompanied by a boat.

DON'T forget that it takes as much ability to be able to swim in water five feet deep as it does in much deeper water, and that it is much safer to swim in shallow water because you can always rest when tired.

DON'T dive into water unless you are sure it is free from obstacles and of sufficient depth for diving.

DON'T use inner tubes to learn to swim or play on. They may slip away and let you sink in deep water.

DON'T use rafts. They may carry you out beyond your depth.

DON'T try to swim after a ball or anything else being blown out from shore by the wind or current.

It can travel faster than you can, and you may become tired and be unable to swim back to shore.

DON'T climb out on rock piers. They are often very slippery. You might fall and break your neck, or seriously injure yourself.

DON'T cry for help if it is not required. You may need help some time and then nobody may pay attention to your difficulties.

DON'T get into a canoe unless you are an experienced swimmer or boatman. Never stand up in canoes or small boats, or change seats, nor move about in unnecessary manner.

This is the most dangerous thing you can do, and more accidents happen through this form of carelessness than from any other cause.

dry ingredients should be mixed thoroughly first of all. The molasses is then stirred into the water and this solution added to the bran and the parls green. In mixing the bait, add only enough water to make the material the consistency of wet sawdust. It must not be made sloppy but so that it will crumble in the hands and slip through the fingers easily.

In the prairie provinces, the bait should be spread after seeding but before any plants are up. In the case of transplants, the ground to be treated should first be watered but allowed to warm up again before the poisoned bait is broadcast.

Pedigree certificates, registered by the Canadian National Livestock Records, approved by the Dominion Minister of Agriculture, for the first four months of 1936 numbered 28,912.

"Great Britain's navy is still invincible and is ready and willing to tackle any force which dares to challenge it, whatever its armament," Sir Roger Keyes.

## A New Record

Sammy Richardson, dusky Toronto track and field ace, shown breaking Canadian record for running hop, step and jump at Ontario Olympic trials in Hamilton. He jumped 48 feet 7 inches and stopped his afternoon's performance by winning the running broad jump. Expected to place in sprint, the indifferent Toronto star arrived too late to compete.

CHICAGO.—The disaster to the spring wheat crop in the United States Northwest promises to be duplicated in the Canadian West. Since the middle of June, extremely high temperatures with an absence of anything but light focal showers, has resulted in great deterioration of the Canadian spring wheat crop. Similar conditions have played havoc with the United States spring wheat crop, and since the first of July, estimates have been steadily reduced. The loss in the United States crop naturally was bullish, but it affected mainly the domestic markets. With the threatened loss in Canada, the whole wheat world is affected.

For several years, Canada has been carrying along a huge surplus from year to year, and this wheat has been a bar to any so-called bull movement in any other quarter. Bullish conditions in the United States were rendered inoperative by the importations of wheat from Canada, and the sensationally strong developments in South America the past season were nullified by the generous supplies of wheat available in Canada. The policy adopted by the Canadian Grain Board to sell wheat at comparatively low prices lulled the importing world into security, as it did not seem possible that Canada could dispose of her supply ahead of a big new crop.

Canadian Carry-Over Drops

At the present time, however, with estimates of the Canadian crop ranging from 200,000,000 to 250,000,000 bushels, compared to 350,000,000 bushels forecast a month ago, and with total exports for the year from Canada aggregating upwards of 250,000,000 bushels, the carryover will be cut to about 140,000,000 bushels, and the total crop and carry-over will be less than 400,000,000 bushels, it is expected.

European buyers have been slow in recognizing the seriousness of the situation, but late reports indicated the heaviest buying on the part of European buyers in many months.

Total world crop and carry-over of wheat will probably be less than 4,000,000,000 bushels, or the smallest volume since 1925. With no big available supply in Canada and a European crop placed 80,000,000 bushels less than last year, with extremely little wheat to draw upon from south of the equator, wheat importers are facing a decidedly tight situation for the next six months. Wet harvest conditions in France and drought and heat damage in Russia are complicating the situation abroad.

Heavy Hedging Sales

Prices have been reactionary at times lately due to heavy hedging pressure, buyers being cautious in following the bulge; but in general the tone has been strong. Liverpool advanced to new high levels for the season, and Winnipeg recently has been relatively firm.

Farmers in Oklahoma and Kansas are said to have stored their wheat unsold, and are holding for much higher prices. Mills and elevators are buying cash wheat actively and this is keeping premiums strong despite the big receipts.

## LOSSES IN CANADIAN CROP AFFECT WORLD

CHICAGO.—The disaster to the spring wheat crop in the United States Northwest promises to be duplicated in the Canadian West. Since the middle of June, extremely high temperatures with an absence of anything but light focal showers, has resulted in great deterioration of the Canadian spring wheat crop. Similar conditions have played havoc with the United States spring wheat crop, and since the first of July, estimates have been steadily reduced. The loss in the United States crop naturally was bullish, but it affected mainly the domestic markets. With the threatened loss in Canada, the whole wheat world is affected.

For several years, Canada has been carrying along a huge surplus from year to year, and this wheat has been a bar to any so-called bull movement in any other quarter. Bullish conditions in the United States were rendered inoperative by the importations of wheat from Canada, and the sensationally strong developments in South America the past season were nullified by the generous supplies of wheat available in Canada. The policy adopted by the Canadian Grain Board to sell wheat at comparatively low prices lulled the importing world into security, as it did not seem possible that Canada could dispose of her supply ahead of a big new crop.

Canadian Carry-Over Drops

At the present time, however, with estimates of the Canadian crop ranging from 200,000,000 to 250,000,000 bushels, compared to 350,000,000 bushels forecast a month ago, and with total exports for the year from Canada aggregating upwards of 250,000,000 bushels, the carryover will be cut to about 140,000,000 bushels, and the total crop and carry-over will be less than 400,000,000 bushels, it is expected.

European buyers have been slow in recognizing the seriousness of the situation, but late reports indicated the heaviest buying on the part of European buyers in many months.

Total world crop and carry-over of wheat will probably be less than 4,000,000,000 bushels, or the smallest volume since 1925. With no big available supply in Canada and a European crop placed 80,000,000 bushels less than last year, with extremely little wheat to draw upon from south of the equator, wheat importers are facing a decidedly tight situation for the next six months. Wet harvest conditions in France and drought and heat damage in Russia are complicating the situation abroad.

Heavy Hedging Sales

Prices have been reactionary at times lately due to heavy hedging pressure, buyers being cautious in following the bulge; but in general the tone has been strong. Liverpool advanced to new high levels for the season, and Winnipeg recently has been relatively firm.

Farmers in Oklahoma and Kansas are said to have stored their wheat unsold, and are holding for much higher prices. Mills and elevators are buying cash wheat actively and this is keeping premiums strong despite the big receipts.

## Lacombe Beats Bentley 4-3 in Ball Game

Lacombe scored a 4-3 victory over Bentley here Friday night in an exhibition game of baseball. Bentley scored twice in the first inning and again in the third. Lacombe tied the score in their half of the third on hits by Lee, Todd, Frizzell, Hopous and Lett. A three-base hit by Bentley and an overthrow at third, enabling him to score, finished the game in the fifth inning, owing to darkness.

Bentley—G. Garries, J. McFadyen, A. Thorpe, Ray Garries, W. Thorpe, N. Hunter, R. Garries, F. Drake and T. Butcher.

Lacombe—Todd, Frizzell, Lewis, Bennett, W. Hopous, Lett, Clift, Grundwell and Lee.

## Clive

CLIVE—Jack and Douglas Wilson and John Morton are holidaying at Sylvan Lake.

Mrs. Phares and Cecil Kocher and family are camping at Gull Lake. Mrs. Ernie Dickenson and daughter Ella, former residents of Clive, who left here 20 years ago, motored into town Sunday from Detroit, Mich., to visit friends here.

A hail storm passed through north of town at 11 o'clock Friday night, doing damage to crops of from 10 to 100 per cent.

A number of Clive residents attended the Red Deer Fair last week in Winning Streak.

That Clive can boast of a real ball team this year is indicated by the fact that they are putting the skids under their opponents with regularity these days. At Mirror last week they defeated that team 6-5 and handed a lacing to Eckville at Clive on Friday to the tune of 14-4, and shut out Stettler on Tuesday on the home grounds by a 5-0 score.

Charles Henn and wife have returned home after spending a month at Sylvan Lake with their daughter Ethel.

The dance held in the hall last Friday night was not very well attended owing to the holiday season. Some of the early fields of wheat are ripening fast and will be ready to cut in a week or ten days.

## Two Fine Pictures

## Come to Avalon

A double bill will be presented at the Avalon Theatre on Thursday, Friday and Saturday of this week. The first, "The Great Impersonation," is from a story by E. Phillips Oppenheim. This is a thrilling spy adventure by an author whose writings are famous the world over.

The other feature on the program has as its star Jane Withers, a juvenile actor who never fails to please both young and old.

The last depression has been a depression of plenty. About the only thing of which there was a shortage was restraint—Jesse H. Jones.

## Overflow Crowd Hears Premier

(Continued from Page One)

when we will lend to the farmers the same way"—and cheers from the listeners.

"Prosperity certificates are the first move toward Social Credit and basic dividends," the Premier stated. The method in which basic dividends will work was then touched upon, and the hope expressed that registration could be finished by the last day of August, "but that is not a promise," the Premier laughingly said.

"Co-operation between themselves, and the manner in which the people adjust themselves to the new conditions—on this depends the success of Social Credit in this province," Premier Aberhart concluded.

Only Practical Remedy  
"After listening to the best that the brains in Ottawa could offer during the last session, I am more convinced that Social Credit is the only practical remedy for our troubles," Norman Jaques, M.P. for Wetaskiwin, and first speaker of the evening, declared. Mr. Jaques claimed that the Social Credit party would have made much bigger gains in the Manitoba elections if the election had not been sprung so quickly.

Speaking of the time spent aiding different candidates in Manitoba, the Social Credit member in Ottawa said: "I found lots of interest, but little organization."

Mrs. Rogers Speaks  
"Your Premier was the only one in Canada with courage enough to cut the interest rate on bonds," said Mrs. Edith Rogers, M.L.A. for Ponoka, and the next speaker. During her speech, she asked the people to "Buy Alberta made goods" and showed samples of hemp grown in the Ponoka district and suitable for the manufacture of binder twine.

"Premier Aberhart has challenged the money interests of the world; it is a gigantic task, and he can succeed only if the people co-operate for one set purpose—the freedom of the people from economic bondage," she concluded.

Describes Alberta Goods  
Hon. W. A. Fallow, Minister of Public Works, gave a detailed account of Alberta produced goods, proffered his belief that Alberta and B.C. should be one economic unit and expressed the thought that before long, trade arrangements will be made between these two provinces.

"If we used all our own products, and only our own products, there would be no unemployment in Alberta," Mr. Fallow declared.

R. E. Ansley, M.L.A., Leduc, asked the people to be patient and for the people co-operation.

B. D. MacMillan, M.L.A., acted as chairman for the meeting.

SOCIAL CREDIT CONVENTION  
A resolution asking that a moratorium be declared on all farm mortgages given prior to 1935 or alternatively that the Exemptions Act be extended so as to protect the mortgaged home, and to include sufficient lands to provide a decent standard of living for the farmer, such

BRING YOUR ROLLS TO US FOR

CAMERION STUDIO AND GIFT SHOP

legislation to be enacted immediately, either by order-in-council or by a special emergency legislation, was passed at the Social Credit convention held in the Sales Pavilion, Lacombe, on Wednesday afternoon, with an attendance of close to 300 persons, including 54 accredited delegates. The above resolution was sent by Ripley Social Credit Group, as it was found that foreclosure proceedings with consent of the Debt Adjustment Board were being carried out.

"Unless Prosperity Certificates are kept in circulation, they will be useless," declared B. D. MacMillan, M.L.A., reviewing the accomplishments and attempted accomplishments of the government. Mr. MacMillan claimed the government was doing everything within its power to take care of the holders of savings certificates, where possible.

The drought situation and its unusually heavy demands on the government will make the task of putting into operation the principles of Social Credit more difficult than ever, Mr. MacMillan declared, but "I believe that dividends will be paid well within the 18 months period as promised."

R. E. Ansley, M.L.A., Leduc, spoke of the organization Social Credit has within the province, with 1200 groups now operating and another 400 in the process of formation.

The old slate of officers were re-elected: President, T. F. Roberts; vice-president, Wm. Chessor; secretary, J. Russell; treasurer, C. Sampson.

Successful Social Held by W.M.S.

Eclipse Ladies' Aid and Women's Missionary Society held a very successful ice cream social at the P. A. Rainforth home on Thursday evening, July 23rd. Horse-shoe, croquet and softball games were indulged in and as darkness fell, the guests gathered in the house, where a program of gowboy songs by the young men, a solo by Mrs. J. Waterman and a character sketch by Mrs. Wagner were greatly enjoyed. Proceeds of the ice-cream social resulted in a nice addition to the funds.

## WOOD RIVER WINS LEAGUE SHIELD

A scoreless draw resulted in the final home and home soccer football game between Lacombe and Wood River, played on the grounds of the latter, on Tuesday last.

With total goals to count, Wood River, by securing a two-goal lead in the first game, played at Lacombe, wins the Central Alberta League shield.

A strong gale blew across the grounds during the game, making the ball difficult to control. Lacombe had the advantage of the wind in the first half, and although having the best of the play, could not penetrate the stubborn defence put up by the homesters.

With the wind at their backs in the second half, Wood River attacked strongly and tested the Lacombe defence severely, but were unable to score. Both goalies excelled themselves and pulled off some wonderful saves.

Wood River—James, Roberts, Groom, Davies, O. Peterson, Hughes, E. Reed, L. Jones, A. Reed, E. Jones and E. Peterson.

Lacombe—Carter, Shaw, Law, W. Prizell, Sheridan, Giff, W. Brooks, E. Todd, G. Brooks, Whitte and Cartwright.

Sergeant (to recruit): "What is the first thing you do when you clean your rifle?"

Recruit: "Look at the number, sergeant."
